Furniture for people

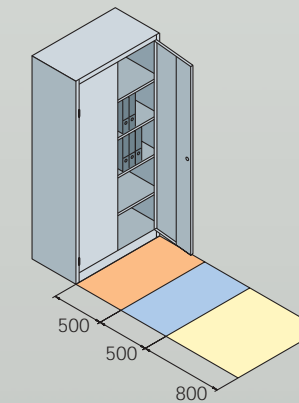

Visualisation of the functional area requirements of a tambour cupboard.

Compared with a 2 door cabinet.

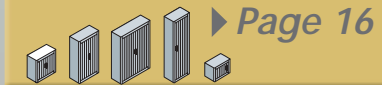

- = functional area
- = user area
- = service area

Omnispace: small footprint, large capacity

Office accommodation is expensive. A good idea then, to use intelligent, cabinet storage systems to make the most of the space available. Technically competent, with excellent quality and high functionality, as well as good looking designs, Omnispace tambour cupboards make a perfect storage interior for any office. Furthermore, the variety of interior fitment solutions ensures that every mm of space is fully utilised.

Omnispace tambour cupboards do not require the same functional area as the one required by 2 door cabinets. This saves space and cost. In addition, the handling is easy and comfortable – easy-slide opening gives instant access to all the contents, allowing smooth and uninterrupted working and greater efficiency.

All models and size variations at a glance

Easy-slide tambour doors in recyclable plastic, fitted with a hook-over lock and two keys. There is a practical moulded grip inset into the door.

The shelves are adjustable on a roster of 15 mm punched into the side skins. They are well suited for file storage or under shelf lateral filling pockets. With an even weight distribution the shelves will carry up to 50 kgs.

Making the most of the office. With Omnispace

Getting the most from your office space whilst complying with current regulations is easier than you might assume.

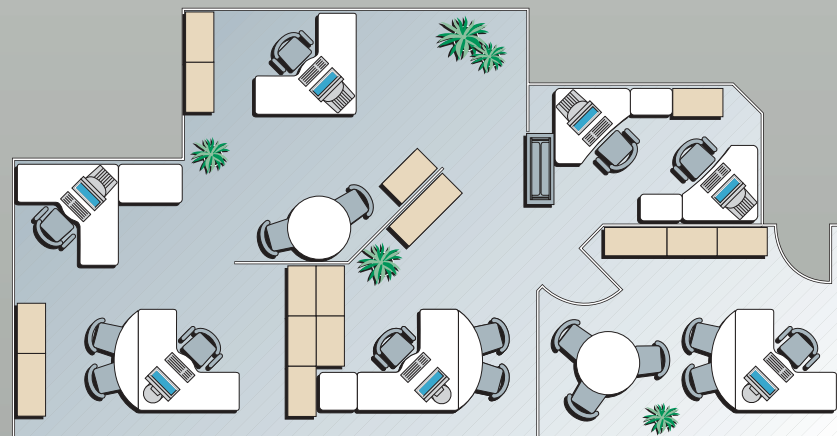

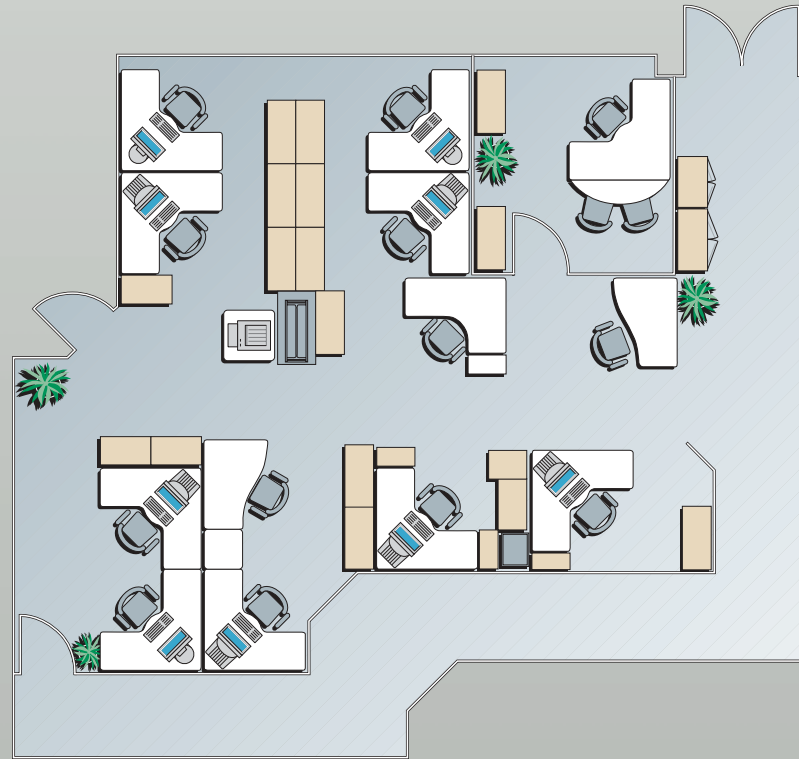

Using Omnispace gives the best opportunity to arrange storage space efficiently and still have all the interior at your fingertips. As there is no functional space, as required by hinged doors, both the footprint of and access to the Omnispace series are superior.

The reduced footprint means:

- More workstations and storage on a given footprint.
- A more generous lay-out using the same footprint.
- A more cost-effective use of office space.

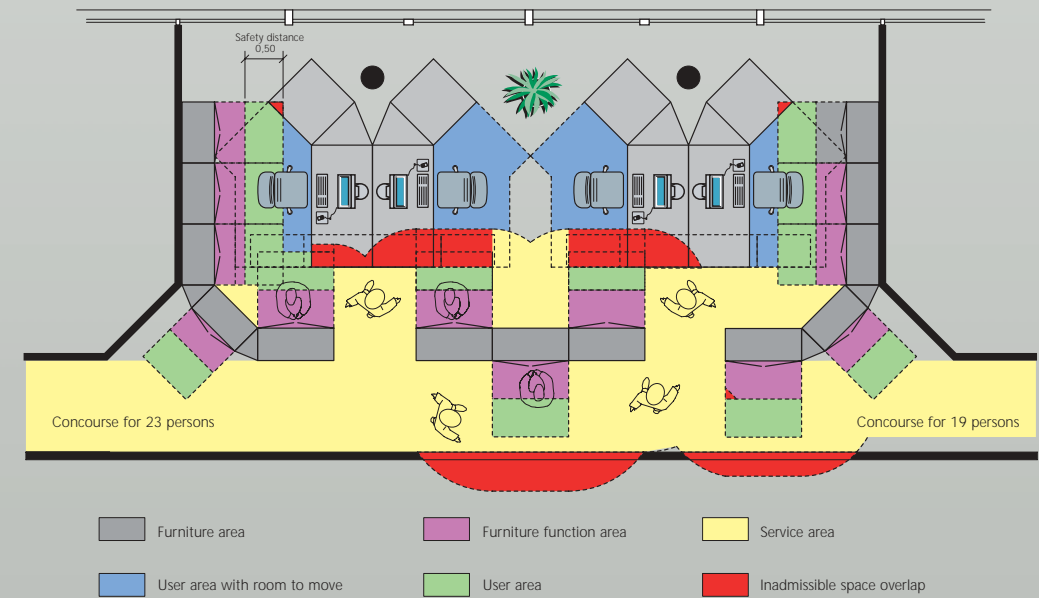

The examples on these two pages illustrate these advantages.

Examples of actual space plans implemented using Omnispace tambour cabinets for best use of office space.

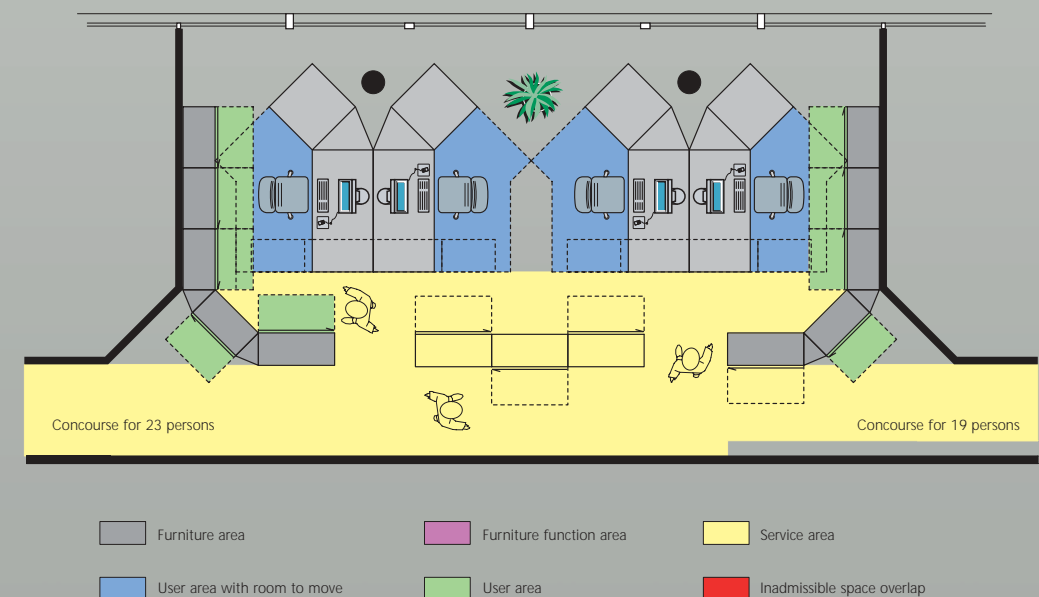

Source: Cadence in Boulogne-Billancourt, France

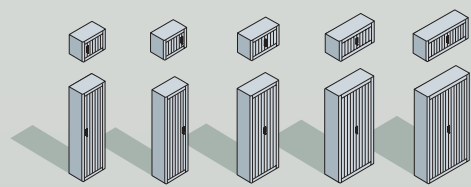

Example of an office furnished with 2 door cabinets. As the doors open into the middle of the office, a functional area is required which uses more space.

Omnispace is different. With the same area for the same workstations and the same storage space we maximise the accommodation for employees whilst adhering to workplace regulations.

Source: Breidenstein + Reichenbach/Linden, Germany

Operating at a high level

No need to lose the space between the top of the cabinet and the ceiling.

Using the full height of the office space creates additional storage for those files which are not required regularly but when needed they are not far away and save the trip to the archives. Omnispace stack-on units are ideal for this application. With stack-on units to match all cabinet widths the combination and expansion of storage runs is possible for all users, giving an already efficient installation, an integrated design appearance.

Omnispace conquers space!

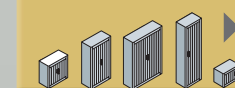

Multidrawer unit for 15 drawers to fit a cabinet width of 800 mm or for 20 drawers to fit a width of 1200 mm

Tambour door cabinet with lateral file pockets, 2 adjustable shelves. Carcass RAL 9006 white aluminium. Doors maple finish. (upcharge option). H 1030 x W 1200 x D 420 mm Order No. 3243-65

Tambour door cabinet with lateral file pockets, 3 adjustable shelves. Carcass and door in RAL 7035 light grey. H 1345 x W 1200 x D 420 mm Order No. 3223-65

Tambour door cabinet with lateral file pockets, 4 adjustable shelves. Carcass RAL 7021 anthracite, tambour door in beech finish (upcharge option). H 1660 x W 1200 x D 420 mm Order No. 3213-65

All shelves are height adjustable on a 15 mm roster punched into the side skins. File storage and lateral file pocket storage are possible with the cabinet roof offering an extra row for lateral files. Evenly distributed, the shelves carry a load of up to 50 kgs.

Incredible capacity!

Customers experienced in the use of lateral file pockets will have come to appreciate their versatility. Ideal for just a few documents or a small folder they do not require pull-out rails and depending on design will remain in the cabinet when documents are added or removed. The Omnispace series offer perfect sizes for the use of lateral file pockets from 2 to 6 levels. The universal construction of the shelves ensures a flexible approach to changes in the filing method, thus giving good performance and reliability.

1 Tambour door cabinet with lateral files, 5 adjustable shelves. Carcass and door in RAL 7021 anthracite. H 1980 x W 1200 x D 420 mm Order No. 3203-65

2 Tambour door cabinet with lateral files, 2 adjustable shelves. Carcass and door in RAL 7021 anthracite. H 1030 x W 1200 x D 420 mm Order No. 3243-65

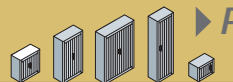

All colours, finishes and accessories currently available are shown on pages 14 + 15.

Omnispace desk height cabinets are especially suited for location at the workstation. There they provide a practical storage solution for everything needed close to the workstation whilst providing an additional hard wearing work surface for paper, fax machine or printer. Beyond this function, they allow planners to divide and organise office space in an attractive way.

Everything close to hand and under control

1 Tambour door cabinet with 1 adjustable shelf. Carcass and door in RAL 9006 white aluminium
H 720 x W 800 x D 420 mm
Order No. 3251-00

Added top in maple laminate finish 5000-04

2 Tambour door cabinet as above but with door in maple finish (upcharge option)
Order No. 3251-00

Added top in maple laminate finish 5000-04

3 Tambour door cabinet as above but with carcass and door in RAL 7021 anthracite
Order No. 3251-00

Added top in beech laminate finish 5000-05

approx. 490 mm wide

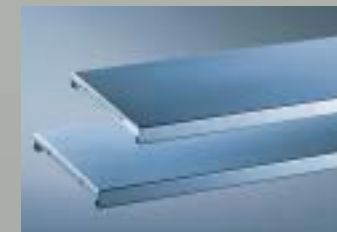

Multidrawer unit with
15 or 20 drawers

Pull-out suspension frame on
ball bearing slides

The Omnispace shelves can be used for storing files, other materials and for lateral file pockets.

Everything at a glance

The Omnispace series of cabinets provide the solution for all office storage requirements. A choice of seven heights and four widths gives customers an nearly endless choice. Combined with the intelligently designed interior fitments (page opposite) choosing Omnispace means choosing a future proof storage system. Omnispace by C+P – more capacity on a smaller footprint.

The right solution for any application

Omnispace tambour door cabinets are available in three versions:

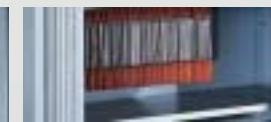

- for use with lever arch files
- for use with lateral file pockets
- without interior fitments

Often the difference in the product codes for -00 and -05 models is only the numbers of shelves leaving the shelf itself to be used for lateral filing or lever arch files making it easy to change your filing system at some future date.

The empty cabinets provide the basis for customised interiors according to clients' requirements.

Cabinets ending in **-00** are designed for **standard files**

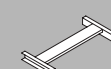

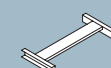

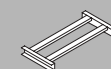

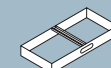

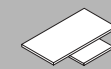

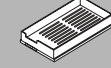

Cabinets ending in **-65** are designed for **lateral file pockets**

Cabinets ending in **-01** are **empty**, designed for individual customer configuration

Office Furnishing Expertise from C+P

C+P supply much more than the excellent Omnispace series of storage cabinets. Making interiors work is our business and should you require assistance in planning and furnishing:

- offices and archives
- changing- and wardrobe facilities
- contract interiors

we should be delighted to discuss your requirements.

Your local dealer will be pleased to visit you.

Office and archive furnishing systems

Office furniture from C+P covers a large spectrum of furniture for business – from solutions for clerical workstations through to executive offices – from desks and containers through to storage solutions. A perfect example is the workstation Workflow® by C+P for use sitting down or standing up as required or desired.

Workflow® brings together the VDU workstation, the stand-up work surface and the meeting extension into one workplace and is thus the perfect workstation for the teamworker.

Changing room and wardrobe systems

C+P is one of the market leaders in Europe supplying changing room and wardrobe cabinets and systems. C+P cabinet systems are used for common rooms, sports facilities, schools, fitness studios, leisure facilities, pools, fire brigades, reception areas, offices and others. C+P provides tailor made solutions. And with innovations such as the self-ventilation concept or the floor raised changing cabinets we keep one step ahead.

C+P is one of the foremost furniture manufacturers in Europe.

Continuous innovation, regular investments and market led products are guarantors for C+P quality and performance.

Our clients know they can rely on C+P for the best solutions.

Our quality management system is ISO 9001 certified.

Many of our products carry the GS-Certificate (tested for safety symbol) having passed tests at the test facilities RW-TUV and TUV Thüringen. We should be pleased to provide copies of certificates if required.

ID-Collection

Contract furniture or design object?

The ID collection provides integrated contract furniture for all applications. From A-Z it enhances our clients' interiors or it shines in its own right. Top in design and quality, the ID collection speaks for itself, especially when a certain touch of class is required.

Furniture for people
