MITO

Designer **Simone Bernocchi**,

an Italian architect born in Cremona on the river Pad, graduated from the Polytechnic University of Milan with major in architecture.

„Architect in one of the most exciting professions in the world, because even though almost everything has already been created on Earth, design is still the biggest adventure”.

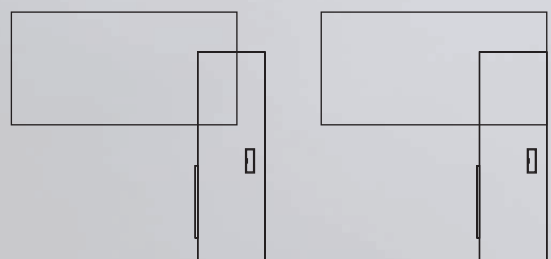

MITO

The cabinet can be arranged in two positions.

Mito is a new executive furniture series composed of the elements that create representative and functional workplaces. The structure pattern is available in two finishes – light and dark sycamore. Combined with white elements, it perfectly emphasizes on prestige and elegance as well as individualism. **Mito** looks supremely in small and large rooms. According to the individual taste, the desk can be supplied with a side cupboard. This managerial furniture set ensures that all necessary things are easily accessible.

For the first time, the technology of synchronous 3D structure was used in the production of plates for **MITO**. In order to make it more authentic, both the wood pattern and the surface texture were reproduced with greater accuracy and precision.

Modern interiors make a perfect background for the minimalist form of **MITO** furniture. Simple geometric shapes and a limited but carefully selected number of pieces of furniture allows to create the result of austere and tasteful elegance.

3D synchronous texture technology

The wood-like texture can be both seen and felt by touch. The effect of noble matt veneer is highlighted by the glossy pores on the melamine surface. The choice of this decor was inspired by the very natural colour of sycamore.
