

RH MERE0

DESIGNED FOR HUMAN PERFORMANCE

Inspired by the dynamic nature of today's working life, the RH Mereo is a perfect fit for anyone. Improved ergonomic features, intuitive handles and a clean shape makes it easily adjusted to personal needs and preferences – no matter what size or shape you are. A chair for the whole office to share, providing both bodies and minds with extra energy.

ENHANCED PERFORMANCE

The RH Mereo is crafted to enhance performance for both individuals and teams in contemporary work places. Built around our unique ergonomic technology that follows your body's natural structure, this chair is also characterized by high flexibility and strong visual elegance.

ACTIVE SEATING

Movement is crucial in order to stay concentrated and perform well during long days at the office. The RH Mereo follows even your smallest movements to always keep you active and provide support. This in turn stimulates blood circulation and facilitates breathing. Just sit down and adjust the chair to your body. The rest comes intuitively.

UPRIGHT POSTURE

Good posture is another key to endurance and helps relieve your body from strain, tension and pressure. The RH Mereo prompts you to always keep an upright position with the spine in a natural s-curve. Our unique Tvedt cushion in the upper back rest provides a gentle push between shoulder blades, to help you sit straight and keep an open posture. The chair's main movement points are located near the knee and hip joints which helps you keep your feet on floor without adjusting seat or backrest.

HOW THE RH MEREOWORKS

DESIGNED FOR HUMAN PERFORMANCE

INNOVATIVE & ELEGANT

The RH Mereo is developed in close collaboration between Flokk and designers from Fjaryl, combining ergonomic expertise with user centred innovation. With a strong foundation in Scandinavian design, the RH Mereo family balances aesthetics, function and well being, resulting in high performance seating solutions tailored for modern sustainable work environments.

DESIGNED FOR HUMAN PERFORMANCE

LONG
LASTING
&
SUSTAINABLE

All parts of the RH Mereo are easy to replace and disassemble. Even the seat is exchangeable, which is unique. Each component is fully recyclable and can be regenerated into new products. All materials are free from toxic substances and we use as little material as possible to produce each chair. This makes the RH Mereo a durable chair, which in turn contributes to less transportation, less packaging and a healthier environment.
